

The 73th Workshop of Ion-molecule Reaction Interest Group,
The Japanese Mass Spectrometry Society

Elements of Universe & Earth, Molecular Evolutions, and Origin of Life

[By] Ion-molecule Reaction Interest Group,
The Japanese Mass Spectrometry Society

[When] November 1, 2019(Fri)

13:10~18:30 (Opens 12:30)

[At] S/PARK Hall (SHISEIDO Global Innovation Center)

1 2 11 Takashima, Nishi ku, Yokohama shi, 220 0011

<https://goo.gl/maps/qDgZXXYxrZH2FT9>

[Language] Jp or En (Slides in English)

[Registration] ←Register by 10/18, 100 seats only

[Fee] Free (for those eager to INSPIRE !)

Program

13:15~ Dr. Kosuke Fujishima (ELSI, Tokyo-Tech.)

➤ Peptide selection using mineral surface and its application towards searching for extra-terrestrial life

14:10~ Dr. Kenji Hamase (Kyushu Univ.)

➤ Enantioselective analysis of amino acids and hydroxy acids in extraterrestrial materials

16:05~ Break

16:15~ Dr. Mayuko Nakagawa (ELSI, Tokyo-Tech.)

➤ Multidimensional isotopologue analysis for understanding origin and environment of molecules ~ High-resolution Isotope ratio mass spectroscopy widen the view of isotopologue world~

17:10~ Dr. Alexis Gilbert (School of Science, Tokyo-Tech)

➤ Isotopologues of organic molecules: concepts, measurements and applications

17:50~ Dr. Noriyuki Kawasaki (Hokkaido Univ.)

➤ Research on the origin and evolution of Solar System using secondary ion mass spectrometry

18:45~ Mixer (Payment required at cost)
